DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-6, 13-19, 21, and 26, drawn to form fill techniques classified in class 715, subclass 224.
 - II. Claims 7, 8 and 20, drawn to caching methods, classified in class 709, subclasses 203, 231.
 - III. Claims 9-12, 22, 23, 24 and 25, drawn to encryption techniques, classified in class 705, subclass 26 and 51.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I details a form filling technique that utilized a user's form completion and extracts knowledge based upon the user's content. Invention II details a caching method and details the storing of an index of domains which are identified by version numbers. The versions contain records for each domain supported. Invention III details encryption methods which include user specific symmetric keys stored in a user database.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
